ASUS IoT

Future-facing technology for modern healthcare

NUC leads the smart-healthcare industry, developing a wide range of offerings driving digital transformation and addresses bedside terminals, patient monitors, infusion pumps, digital diagnostics and more.

High-quality and rigorously tested products empower medical professionals to monitor and assess patients' conditions in the most efficient way

Reliable medical and industrial platforms including industrial motherboards and edge computers in complete form factors for 24/7 operation in healthcare environments

Rooted in strong software and hardware integration capabilities, NUC products assist medical diagnosis and improve the operational efficiency and overall quality of global healthcare providers

## Empower healthcare workers and elevating patient experiences

62%
Clinicians are interested in working with smart, technology driven tools[1]

80%
Healthcare providers plan to increase investment in technology to provide digital-first care[2]

$200K
Financial loss for healthcare due to patients' dissatisfaction in the US[3]

- Expertise in medical computing
- Provide professional quality care for patients
- Transmit data seamlessly for the operational efficiency
